

DYNAMIC POWER PURCHASE AGREEMENT

Technology led PPA delivered with Total Gas & Power

Powered by Reactive's optimisation platform Tradenergy®

Provides access to a wide range of market opportunities

Delivers advanced imbalance risk management through artificial intelligence (AI) forecasting

AI ENHANCED CONTRACTS FOR RENEWABLE POWER

IMBALANCE RISK MANAGEMENT

Reduced imbalance exposure resulting in improved power prices by using the Tradenergy® optimisation platform

AI ENABLED FORECASTING CAPABILITY

Advanced forecasting underpinned by real-time site conditions and machine learning techniques

FLEXIBILITY MARKET ACCESS

Full market value leveraged by providing access to all available balancing services

ACTIVE PRICE RISK MANAGEMENT

Commodity hedging and optimisation manage the volatility and wholesale price risk

Reactive Technologies' bankable Dynamic PPA offers renewable generators increased value through high quality forecasts and active price risk management.
